DASIEL TORRES

Full-Stack Software Engineer | Payments & Fintech

Open to remote & relocation

Havana, Cuba | dasieldev@gmail.com | +53 5471 0329 | github.com/Dasieloski | dasiel.vercel.app

PROFILE

Full-Stack Software Engineer (B.Eng. in Computer Science, UCI) building complete web products across frontend, backend, APIs and PostgreSQL databases since 2023. Recent work in payments and fintech at Supernova & ACR: payment gateway, card issuing, card management and top-up platforms with bank integrations. Takes products from schema to deploy, with a focus on correctness where money and concurrency are involved.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, SQL, HTML, CSS
Frontend	React, Next.js (App Router, server components), Tailwind CSS, responsive and mobile-first interfaces
Backend & APIs	Node.js, NestJS, REST APIs, Strapi (headless CMS), authentication and role-based access, bank and third-party integrations
Databases	PostgreSQL, Prisma ORM, Redis, relational schema design, transactional and concurrency-safe data access
Infrastructure	Vercel, CI/CD pipelines, Git, GitHub, environment and deployment management
Domains	Payment gateways, card products, top-ups, fintech, e-commerce, multi-tenant SaaS

PROFESSIONAL EXPERIENCE

Supernova & ACR | Software Engineer — 2026 – Present

Payments and fintech ecosystem: payment gateway, ACR Pay, ACR Card and ACR Card App

- Engineer across the full stack on products where real money moves: the Supernova payment gateway, ACR Pay, ACR Card and the ACR Card app, working on web interfaces, backend services and APIs.
- Developed and maintained integrations with banks and financial services for the payment gateway.
- Contributed to ACR Pay (top-ups for classic cards and mobile phones in Cuba), ACR Card (Visa and Mastercard card requests) and the ACR Card app (card management, transaction history and transfers between cards).
- Worked on money-movement flows (payments, top-ups, card transfers) where every operation must end in one consistent state, across the web, API and database layers.

Habaluna | Solo Engineer (Freelance) — Dec 2024 – Mar 2025

E-commerce for Luna S.U.R.L (assorted products) · Next.js, PostgreSQL, Prisma, Redis, Vercel

- Owned the product end to end (product decisions, architecture, UX/UI, backend and infrastructure) for an online store selling a varied catalogue of products for Luna S.U.R.L.
- Built the store on a Next.js App Router architecture backed by PostgreSQL via Prisma and Redis: product catalogue, cart and checkout.
- Integrated online payments through the Supernova payment gateway and built inventory and order management.
- Delivered an admin panel for the client to manage products, prices, stock and orders without engineering support; managed Vercel deployment and database provisioning.

Gym Victoria | Full-Stack Engineer (Freelance) Aug 2024 – Dec 2024

Multi-tenant gym management SaaS · Next.js, PostgreSQL, Tailwind CSS, Vercel

- Architected a multi-tenant SaaS from scratch supporting member registration, trainer assignment and tiered membership plans across multiple locations.
- Designed the relational schema (members, trainers, memberships, payments) with referential integrity to prevent inconsistent states before production.
- Implemented role-based access (admin, trainer, member) with secure server-side session management, without relying on an auth library.
- Shipped a Tailwind CSS interface with sub-2-second loads and automated zero-downtime CI/CD on every push.

MK Tattoo Supply | Full-Stack Engineer (Freelance) Dec 2023 – Feb 2024

E-commerce platform · Next.js, Strapi, REST API

- Built an e-commerce platform with live inventory, order processing and payment API integration, from zero to production in eight weeks.
- Engineered real-time stock control that prevents overselling across concurrent orders.
- Delivered a no-code admin dashboard that lets non-technical staff manage 200+ SKUs, orders and fulfillment.

EDUCATION

Universidad de las Ciencias Informáticas (UCI) | Havana, Cuba Sep 2018 – Dec 2023

B.Eng. in Computer Science (Ingeniero en Ciencias Informáticas)
